

Kuhn SW 4014

Reference:	31054382	Make	Kuhn
Model:	SW 4014	Year:	2019
Width:		Spec:	<p>2019 Machine Ex Demo Machine. The KUHN SW 4014 square- and round bale wrapper provides fast, cost efficient and operator-friendly wrapping. Our unique Autoload function detects, loads, wraps and unloads bales automatically, creating a more ergonomic and stressless working environment. Thanks to its solid design, with incorporated hydraulic sliding frame, an extreme wide track is achieved for outstanding stability of the machine. This unique „drive through” operation enables easy loading of the bale and excellent visibility of the wrapping process. The SW 4014 has an operational width of 4 m in the field and 2.5 m during transport. Bales accidently dropped in a corner of the field can be picked up, front- and backwards, by the 2 patented* pair of steel rollers. The film rolls, stretched by pre-stretchers, are cut and hold firmly by the two “scissors-type” film cutters.</p>
